### SUMMARY

Full-Stack Developer with 2+ years building production SaaS products. Fluent in English (C1). Experienced in end-to-end delivery from DB schema to cloud deployment on AWS.

### WORK EXPERIENCE

**Full-Stack Developer | Confidential (Stealth Mode Startup)**

January 2024 – March 2026

- Full-Stack Development: Lead the end-to-end development of scalable web applications using Next.js and FastAPI.
- Database Architecture: Optimized PostgreSQL schemas reducing query time by ~40% for a high-traffic multi-tenant SaaS application.
- Cloud Infrastructure: Orchestrated deployment pipelines and managed cloud resources on AWS and Vercel.
- Feature Implementation: Developed complex features including real-time data synchronization, secure authentication (JWT), and interactive UI components.

**Digital Forensics Specialist | Independent / Legal Services**

February 2026 – Present

- Forensic Investigation: Conducted digital forensic analysis to identify and preserve critical electronic evidence for legal proceedings.
- Data Integrity: Audited file copies using cryptographic hashes and algorithms to ensure 100% data integrity and chain of custody.
- High-Stakes Accountability: Managed urgent cases with maximum responsibility, ensuring accuracy under tight judicial deadlines.
- Wrote automated scripts for cryptographic hash verification across large file sets. Managed high-stakes technical documentation under judicial deadlines.

### PROJECTS

**YaMayorista - E-Commerce**

Techs: React, Supabase, Prisma, PostgreSQL, Typescript, Vercel, Resend

- Architected a production-ready wholesale e-commerce platform handling multi-category product catalogs (food, beverages, dairy) with real-time inventory management.
- Engineered a full-stack purchasing flow with React and Node.js, integrating Supabase as the backend layer for authentication, storage, and database operations.
- Designed a relational PostgreSQL schema optimized for bulk-order queries, supporting dynamic category filtering and scalable product listings.

**JCRossi Automotores — Dealership Website**

Techs: Next.js, TypeScript, Tailwind CSS, Vercel, AWS (S3, SDK, RDS),

- Designed and deployed a production car dealership website featuring a dynamic vehicle catalog with individual listing pages, WhatsApp lead capture, and Google Maps integration for a local business in Santa Fe, Argentina.
- Built a contact and inquiry system with vehicle-specific selection, enabling direct client-to-dealer communication and driving measurable engagement (500+ satisfied clients listed on-site).
- Architected the full frontend with Next.js dynamic routing for SEO-optimized individual vehicle pages, deployed on Vercel with zero-downtime updates.

### EDUCATION

- UTN — Information Systems Engineering (2023–present)
- CS50X — Computer Science (HarvardX)
- CS50 SQL
- CS50 Python

### STACK

- Frontend:** React, Next.js, Tailwind CSS, HTML 5, CSS
- Backend:** Python, Typescript / Javascript, Express.js, FastAPI, GraphQL, REST API
- Tools/DB:** SQLAlchemy, Prisma, Git/Github, Postgres, SQLite, MySQL, NoSQL, Figma, WordPress, Linux, Bash.
- DevOps & Cloud:** Docker, Docker Compose, Git/GitHub, GitHub Actions (CI/CD), Vercel, AWS (EC2, S3).
- AI & LLMs:** LLM, Prompt Engineering, AI Agents, RAG, LangChain, Claude
- Testing:** Vitest, Pytest, Jest, Playwright

### LANGUAGES

- Inglés:** C1 Advanced (Fluent).
- Spanish:** Native
